

Ideation Phase

Brainstorm & Idea Prioritization

Date	30 June 2026
Roll Number	23A51A42C4
Project Name	Leave Approval System
Maximum Marks	4marks

Step 1: Team Gathering, Collaboration & Select the Problem Statement

Problem Statement

Many organizations still manage leave requests manually through emails, paper forms, or phone calls. This process is time-consuming, difficult to track, and may result in delays or lost requests.

Selected Problem

Develop a Leave Approval System using ServiceNow that allows employees to submit leave requests online, managers to approve or reject requests, and the system to automatically send notifications.

Step 2: Brainstorm, Idea Listing & Grouping

S.No Brainstormed Idea

Purpose

- | | | |
|---|--|--------------------------------------|
| 1 | Create a custom Leave Approval application | Build the application in ServiceNow |
| 2 | Create a Leave Request table | Store employee leave details |
| 3 | Add Employee, Manager, Leave Type, Start Date, End Date, Reason fields | Capture leave information |
| 4 | Auto-generate Request Number | Provide a unique ID for each request |
| 5 | Validate End Date should not be earlier than Start Date | Prevent invalid leave requests |

S.No Brainstormed Idea

Purpose

6	Validate Start Date should be Today or Future	Avoid applying for past dates
7	Use Flow Designer for Manager Approval	Automate approval process
8	Update Leave Status automatically	Show Pending, Approved, or Rejected
9	Send email notifications to employee and manager	Inform users about approval status
10	Create forms and list modules	Easy access to leave requests

Step 3: Idea Prioritization

Idea

Priority Reason

Create Custom Application	High	Foundation of the project
Create Leave Request Table	High	Required to store leave records
Add Leave Request Form	High	Employees submit leave requests
Date Validation	High	Prevent incorrect data
Manager Approval Flow	High	Main functionality
Email Notifications	High	Keeps users informed
Auto Request Number	Medium	Easy tracking
Status Update	Medium	Displays request progress
